TOP NOTCH RIDES

This is Steve's 2001 Chevy Tahoe that has so much custom work done to it there isn't enough room on the page. Some things include 24" Oasis rims, a 3.5" drop a hard hittin 17,000 watt system powered by 11 Fosgate amps and 6 batteries and dual alternators to supply the volts. An excellently crafted sub box takes up the entire rear, and cradles the 4 18" R.E subs. Of course all those sounds couldn't be complete without some visual effects. So he's got it all covered with a 7" Pioneer screen for the DVD's and a Pioneer Navigation system.

Steve also won a title at the 2004 USACI World Finals in Kansas City, MO. Steve says " 5th Place, its not a first but 5 th in the nation in my class isn't too bad.
